*Journal of Elasticity*

## Contents of Volume 26 (1991)

**Vol. 26 No. 1 July 1991**

C. Davini and Yong-Zhong Huo: On certain surfaces with given Gaussian curvature in the theory of defects in crystals 1
R. Abeyaratne and Hang-Sheng Hou: Void collapse in an elastic solid 23
X. Garaizar: Solution of a Riemann problem for elasticity 43
J.L. Ericksen: On kinematic conditions of compatibility 65

*Classroom note*
J.R. Barber: Some anomalies of the curved bar problem in classical elasticity 75

*Research note*
D.J. Steigmann: A note on pressure potentials 87

**Vol. 26 No. 2 September 1991**

T.J. Pence: On the encounter of an acoustic shear pulse with a phase boundary in an elastic material: energy and dissipation 95
H. Begehr, R.P. Gilbert and C.Y. Lo: The two-dimensional nonlinear orthotropic plate 147
Jianmin Qu and Qianqian Li: Interfacial dislocation and its applications to interface cracks in anisotropic bimaterials 169

**Vol. 26 No. 3 November 1991**

Publisher's notice: 1992 publication programme iii

*Dedication*
R. Abeyaratne and C.O. Horgan: In recognition of the sixtieth birthday of James K. Knowles 197

*Regular papers*
H.C. Simpson and S.J. Spector: Some necessary conditions at an internal boundary for minimizers in finite elasticity 203
P. Podio-Guidugli: Polyconvex energies and symmetry requirements 223
R.L. Fosdick and G.P. MacSithigh: Minimization in nonlinear elasticity theory for bodies reinforced with inextensible cords 239

*Classroom note*
P.J. Davies: A simple derivation of necessary and sufficient conditions for the strong ellipticity of isotropic hyperelastic materials in plane strain 291
